

HIGHTEC DIESEL SYSTEM PROTECT

Fuel additive. It cleans and protects the entire fuel system from the tank to the combustion chamber.

Description

HIGHTEC DIESEL SYSTEM PROTECT contains a selected combination of agents to improve engine performance and operational safety. HIGHTEC DIESEL SYSTEM PROTECT dissolves and disperses deposits and residues such as oil carbon and grime. It safeguards the injection pump's lubricating action with low-sulphur diesel.

Application

HIGHTEC DIESEL SYSTEM PROTECT dissolves and disperses deposits and residues such as oil carbon and grime and binds water in the tank and injection system. It safeguards the injection pump's lubricating action with low-sulphur diesel action with low-sulphur diesel and thus increases operational safety, even during full-load operation. HIGHTEC DIESEL SYSTEM PROTECT improves the start behaviour, ensures uniform injection pressure and quieter idling.

Benefits

- Good cleaning action in the entire fuel system
- Prevention of deposits in the fuel lines, injection pumps and injection nozzles
- Combustion without releasing pollutants
- Reduction in fuel consumption
- Improvement in cold-start behaviour
- Reduction in smoke emissions
- Improved wear protection for the injection pump, especially in the case of low-sulphur diesel
- Very good corrosion protection

Notices

Not suitable for gasoline vehicles.

Dosing

- Add a dose to the tank contents (sufficient for a tank capacity of approximately 60 litres). Do not empty the tank contents completely.
